JINGKE LIANG

Email: jingkeliang88@gmail.com LinkedIn: jingke-liang Portfolio: jingkeliang.site

Skills

Language and frameworks: Python, Java, JavaScript (ES6+), TypeScript, Angular, HTML5, CSS, PHP, React, React Native, Flask, C/C++, ROS2
Development practice: Agile Methodology, UI&UX Design, Accessibility Compliance, Cross-functional collaboration, Quality Assurance & Software Testing
Cloud & DevOps: Git, Jira, Firebase, AWS Azure, Microsoft 365, VMWare (Workstation, Horizon, vSphere), TeamViewer, Google Colab, Anaconda
AI & Data tools: Gemini, GPT, TensorFlow, Data Visualization (Google Charts, D3.js, Tableau, Maple)

Professional Experience

Web Developer Associate | Schulich School of Medicine & Dentistry at Western University **02/2025- 08/2025**
-Developed and optimized high-traffic academic web pages and Rapport Magazine 2025, contributing to 46% increase in click-through rate through improved presentation, navigation and interactive web experiences.
-Designed and implemented JavaScript-based interactive data visualizations, turning complex datasets into visual interfaces.
-Conducted comprehensive technical QA across more than 200 web pages—including broken links, accessibility, responsiveness, loading speed, and structured data (e.g., LD Schema, Robots.txt)—to improve crawlability and SEO performance.
-Collaborated with cross-functional teams including designers, content teams and technical stakeholders to prototype, refine and deliver web features in a cross-functional environment.

Full-stack Developer | StorageVault Canada Inc. **10/2021- 09/2023**
- Participated in sprint planning, daily stand-ups, and retrospectives to ensure timely and high-quality deliverables in DataVault Agile / Scrum team and working closely with developers, designers and business stakeholders to align on project requirements.
- Developed React components and implemented interactive UI features including date picker, toggle switch, paginations, hover effect, map-based interfaces.
- Optimized client-facing database using SQL, Node.js and PHP and resolved frontend and backend bottlenecks, reducing page loading time from 6.3s to 2.8s (within 3s in average) and improving responsiveness for users.
- Performed software testing, debugging, and maintenance across 3 client portals and 25 product pages.

Full Stack Developer Intern | FlexSpace Logistics, subsidiary of StorageVault Canada **06/2021 – 10/2021**
-Collaborated with a cross-functional team in FlexSpace Logistics, actively engaging in business discussions to align site design with business objectives.
- Designed Figma wireframes and developed site functionalities with WebFlow, contributing to a 15%+ increase in click-through and conversion rates through improved page structure, clear navigation and seamless user experience.
- Database optimization: engaged in troubleshooting and optimizing database to improve data retrieval speed and efficiency-Identified and resolved technical issues, ensuring a seamless user experience and system stability.

Education

University of Guelph
Master of Cybersecurity and Threat Intelligence (MCTI) ***09/2026 – 09/2027 (Expected)***
The graduate-level coursework focuses on cybersecurity, threat intelligence, network defense, digital forensics, and hands-on security operations using industry-standard tools.
Computer Science **09/2023 – 06/2026**
- Relevant Coursework: Object-Oriented Programming, Database Management, System simulation, Software Reliability Testing, Natural language processing, User Interface Design.
- Research project: Natural Language Processing to Identify Foundational Skills Mentioned in Co-operative Education
Publication: *Gatto, Laura; Ali, Muhammad; Liang, Jingke; Joseph, Samuel; Gillis, Daniel*, "Transferable Skills Development in University Curricula: Identifying Differences Between STEM and BHASE," WACE International Research Symposium, Auckland, New Zealand (Nov 2025; Conference: April 2026).

Fanshawe College **01/2021-05/2023**
Ontario College Diploma in Web Development and Internet Application
- Developed proficiency in HTML, CSS, JavaScript, React, Angular, PHP, and SQL.
- Worked on multiple group projects and gained hands-on experience in agile development, focusing on collaboration and iteration.

University of Toronto **Graduated**
Bachelor of Science in Major in Mathematics and Applied Statistics
- Relevant Coursework: Probability Theory, Statistical Inference, Regression Analysis, Financial Mathematics, Advanced Calculus
- Research project: Statistical Analysis Project using SAS Macro (Nutrition Intervention Monitoring Surveys).

Research Experience

Using Natural Language Processing to Identify Foundational Skills Mentioned in Co-operative Education Job Postings (Computer Project, Thesis project, University of Guelph)

-Implemented models using Python and TensorFlow

-Compared traditional NLP methods (Word2Vec, SVM) with modern transformer-based approaches (BERT, GPT)

-Conducted literature reviews on NLP algorithms, including legacy methods (SVM, Word2Vec) and modern approaches (Transformers, GPT).

Publication: *Gatto, Laura; Ali, Muhammad; Liang, Jingke; Joseph, Samuel; Gillis, Daniel*, "Transferable Skills Development in University Curricula: Identifying Differences Between STEM and BHASE," WACE International Research Symposium, Auckland, New Zealand (Nov 2025; Conference: April 2026).

Nutrition Intervention Monitoring Surveys (NIMS Research Project, University of Toronto)

- Analyzed the survey questionnaires on infant and young children nutrition for **five different countries,** which were designed as cross-sectional, two-stage cluster sampling method based on administrative areas where NI interventions are currently taking place
- Cleaned and analyzed the data sets from Philippines and contributed to writing the final report in the group of four
- Used **SAS Macro** codes, automatically implement tables into **Microsoft Excel** files for several variables with their frequency, standard error, 95% confidence limits, CV percent and design effect
- Used the result and applied deep learning and machine learning of data analysis on this project

Technical Projects

Network Scanner (Nmap)

Used Nmap to scan networks for open ports and services, analyzing TCP/IP responses to identify potential vulnerabilities.

Academic Web Platform Development (Western University)

Enhanced UI/UX and performance for high-traffic academic web platforms, implemented data visualizations and conducted technical QA including accessibility validation, performance optimization, and structured metadata integration.

Enterprise Web Application Development (StorageVault Canada)

Developed and maintained enterprise web applications using React, Node.js, and PHP; built reusable UI components and supported debugging and performance optimization.

Logistics Web Platform Development (FlexSpace Logistics)

Designed wireframes with Figma and implemented web features using WebFlow and JavaScript, optimized database queries and improved platform reliability.

Financial Portfolio GUI (Java)

Developed a Java-based graphical interface for managing investment portfolios including stocks and mutual funds.

Angular E-commerce Website

Developed a web application with Angular and Firebase for authentication and data management.

Additional Experience

- Website Maintenance Volunteer & IT Support - Maintained and updated community website for local church.

- University of Guelph Accessibility Notetaker – Provided detailed, organized notes to support students with accessibility needs.

- Club Participation: University of Guelph Robotics Team, Google Developer Club, Guelph Cyber Security Club

- Tutoring: Part-time tutor in Tutor Doctor for students in Grade 11 math, Grade 11 physics, Grade 3 English and Grade 12 Math. Helped students with extra learning materials based on student's needs by providing students different teaching methods based on their learning styles. Helped students improve their grades from B to A and A+.

Certificates

-**e-Commerce and Online Business Management** (University of Toronto School of Continuing Studies)

-**Bloomberg Market Concepts** (BMC)

-**Google Analytics for beginner**

-**Artificial Intelligence for Cybersecurity** - LinkedIn Learning
